Examples in this lecture are based on examples that come with the J2ME Toolkit

## Wireless Messaging

- Sockets
  - TCP & UDP
- Http
- Messaging
- Web Services

## http Example

```
import javax.microedition.lcdui.*;
import javax.microedition.midlet.MIDlet;
import javax.microedition.io.*;
import java.io.*;

public class HttpExample extends MIDlet {
    public HttpExample() {

        Display display = Display.getDisplay(this);
        String page;
        try {
            page = getViaHttpConnection("http://www.eli.sdsu.edu/index.html");
        }
        catch (IOException error) {
            page = error.getMessage();
        }

        Form form = new Form("Http");
        form.append( page);

        display.setCurrent(form);
    }

    public void startApp() { }
    public void pauseApp() { }
    public void destroyApp( boolean unconditional ) { }
```

## HttpExample Continued

```
String getViaHttpConnection(String url) throws IOException {  
    HttpURLConnection http = null;  
    InputStream input = null;  
    try {  
        http = (HttpURLConnection)Connector.open(url);  
        int responseCode = http.getResponseCode();  
  
        if (responseCode != HttpURLConnection.HTTP_OK)  
            return "HTTP response code: " + responseCode;  
  
        input = http.openInputStream();  
  
        int pageLength = (int)http.getLength();  
        byte[] data = null;  
        if (pageLength > 0) {  
            int actual = 0;  
            int bytesread = 0 ;  
            data = new byte[pageLength];  
            while ((bytesread != pageLength) && (actual != -1)) {  
                actual = input.read(data, bytesread, pageLength - bytesread);  
                bytesread += actual;  
            }  
        }  
        return new String(data);  
    } catch (ClassCastException e) {  
        return "Not an HTTP URL";  
    } finally {  
        if (input != null)  
            input.close();  
        if (http != null)  
            http.close();  
    }  
}
```

## Messaging

Example from J2ME Toolkit

Classes

- SMSSender.java
- SMSSend.java
- SMSRecieve.java

## SMSender

```
/*

## CDC

### Virtual Machine

Full Java virtual machine specs

No Jit or Hotspot

Regular Java virtual machine does not run on devices

### CDC Class Libraries

When includes class from J2SE includes all the class

Except deprecated methods

- `java.io`  
nearly complete
- `java.lang`  
Missing compiler, UnknownException
- `java.lang.ref`  
Complete
- `java.lang.reflect`  
Complete
- `java.math`  
Missing BigDecimal

- java.net  
    UDP but no TCP
- java.security  
    Minimal
- java.security.cert  
    Only Certificate
- java.text  
    Supports only numbers, dates & error messages
- java.util  
    Nearly complete
- java.util.jar  
    Reading but no writing
- java.util.zip  
    Reading but no writing
- javax.microedition.io
