CS 696 Functional Programming & Design Fall 2015

Instructor: Roger Whitney
Office: GMCS-561
Phone: 619-594-3535
Email: whitney@sdsu.edu
Office Hours: 3:15-5:15 pm Tuesday, Thursday
10 am to Noon Friday

Credits: 3 Units

Course WWW Site: http://www.eli.sdsu.edu/courses/fall15/cs696/index.html
CS596 lecture notes, assignments, course videos and course wiki available at above course web site.

Required texts:
  Clojure Programming by Chas Emerick, Brian Carper & Christophe Grand, 2012

Useful Resource: Clojure Cookbook by VanderHart & Neufeld, 2014

Prerequisites: CS310 (Data Structures), CS320 (Programming Languages)

Topics Covered
Introduction Imperative verses Functional programming
Clojure & Functional Basics
  - Scalar Data Types, Composite types, Lazy evaluation
  - Functional forms, recursion
  - Lambdas, Closures, Macros
  - Namespaces, Multi-methods
  - Lazy evaluation, Immutability
  - Pure functions, first-class functions
  - Currying, memorization, high order functions
  - List compressions, restructuring
  - Collection pipelines
Testing, Clojure - Java interoperation
Concurrency & Mutation
  - Software Transactional memory
  - Vars, Refs, Agents, Atoms, promises, futures
Functional programming, Web Apps, Databases
Functional programming patterns and practices
**Grading:** All programs will be done in Clojure, which will be covered in the course. Your grade in this course will be determined given below. There will be about 5-6 assignments.

- Homework, Programs 1/2
- Exams (2) 1/2

**Crash Policy:** As seats open up in the class they will be filled by seniority. Two undergraduate students will be admitted for each graduate student. In order to determine seniority students must provide unofficial transcripts. Each class period all open seats will be filled. To be considered I must have unofficial transcripts at least 2 hours before class.

**CS596 & CS696 Functional Programming**
There is considerable overlap between CS 595 Functional Programming and Design and CS 696 Functional Design and Programming. You can not take both courses and have them apply to your Masters degree.

**Late Policy:** Late homework will be accepted, but with a penalty. An assignment turned in 1-7 days late, will lose 5% of the total value of the assignment per day late. The eight day late the penalty will be 40% of the assignment, the ninth day late the penalty will be 60%, after the ninth day late the penalty will be 80%. Once a solution to an assignment has been posted or discussed in class, the assignment will no longer be accepted. Late penalties are always rounded up to the next integer value.

**Email & Assignments:** Unless indicated by the assignment all assignments are to be submitted to the course repository. No assignments will be accepted via email.

**No Extra Credit:** There will not be any extra credit assignments. There will not be any extra credit problems in the assignments.

**Cheating:** Any one caught cheating will receive an F in the course.

**Disabled Students:** If you are a student with a disability and believe you will need accommodations for this class, it is your responsibility to contact Student Disability Services at (619) 594-6473. To avoid any delay in the receipt of your accommodations, you should contact Student Disability Services as soon as possible. Please note that accommodations are not retroactive, and that accommodations based upon disability cannot be provided until you have presented your instructor with an accommodation letter from Student Disability Services. Your cooperation is appreciated.
